PIZZA SALES ANALYSIS - SQL PROJECT

Hi I am Gayathri. I've done this Pizza Sales Analysis project using My SQL to helps understand sales performance, customer ordering patterns, and revenue drivers in a pizza business.

This is a SQL-based analytics project performed on a pizza sales dataset to answer business questions using Basic, Intermediate, and Advanced SQL queries.

This project explores a pizza sales database and provides insights into orders, revenue, product mix, and customer behaviour. The analysis covers simple aggregations, joins, time-based trends, and advanced revenue breakdowns using SQL.
